Thanks we will continue forward. As of this morning all current data (mine and river) has been validated as Level 2.

I believe it will be too hard to split out all the mine data at this time. I recommend you stay with the existing project.

Good Morning,

We have one Scribe EDD left for Level 2 validation for the Gold King Mine Area and Gold

King ER. I was informed that possible sampling might be performed this winter by a group up at the mine. I was curious if you wanted to continue to populate the master GKM database with all data or have a new separate mine database?

Thanks

John
